VeriGO MobileID

Access your vital identification documents effortlessly

via your smartphone

www.veridos.com

Your government-issued ID always at your fingertips

We already reach for our smartphones to make payments and to show boarding passes, tickets, and membership cards. With VeriGO MobileID, you'll also be able to access your driving licence and other government-issued identification documents.

Currently, when checking your identification document, officials look for a hologram, or another sign of authenticity.

The VeriGO MobileID app has unique cryptographic procedures which allow officials to easily authenticate your digital identification document.

Both you and the officials can be confident in the security and accessibility of the app.

Veridos' dedicated team has created an innovative solution to effortlessly centralize important documents in a digital wallet.

With VeriGO MobileID banks, airlines, hotels, medical professionals, real estate agents, law enforcement, and many other institutions can quickly verify members of the public to increase security and streamline service delivery.

VeriGO MobileID app is available at all times whether you are connected to the internet or not. That means you can rely on accessing your important documents the moment you need them.

Privacy

VeriGO MobileID puts the control of your identification documents right in your hands. You decide what private information you share, where it's shared, and who it's shared with.

Reliability

VeriGO MobileID makes all documents immediately available so you can easily identify yourself wherever you are, even without internet access.

Security

VeriGO MobileID uses innovative technology to ensure your ultimate safety, including encrypting your personal data, and protecting the app with 2-Factor Authentication.

Your complete digital wallet

1

Straightforward

The design of the app has been created for maximum usability and ease-of-use. Instantly access and show identification documents.

2

Trusted

Veridos is a world-leading expert in physical and digital identity solutions. Together, our teams of engineers and developers have created an unrivalled app.

3

Secure

The specialized databases and encrypted data ensure the security of user information and identity documents while minimising the risk of manipulation.

4

Convenient

Available both with internet access and offline, users can update and access every important document the moment it is needed.

5

Comprehensive

The number of documents which can be uploaded and stored on the app is almost limitless, from driver's licences to government permits.

6

Consent

Each user controls exactly which information is shared via the app including when, and to whom it is released. Consent can be revoked at any time.

7

Authenticated

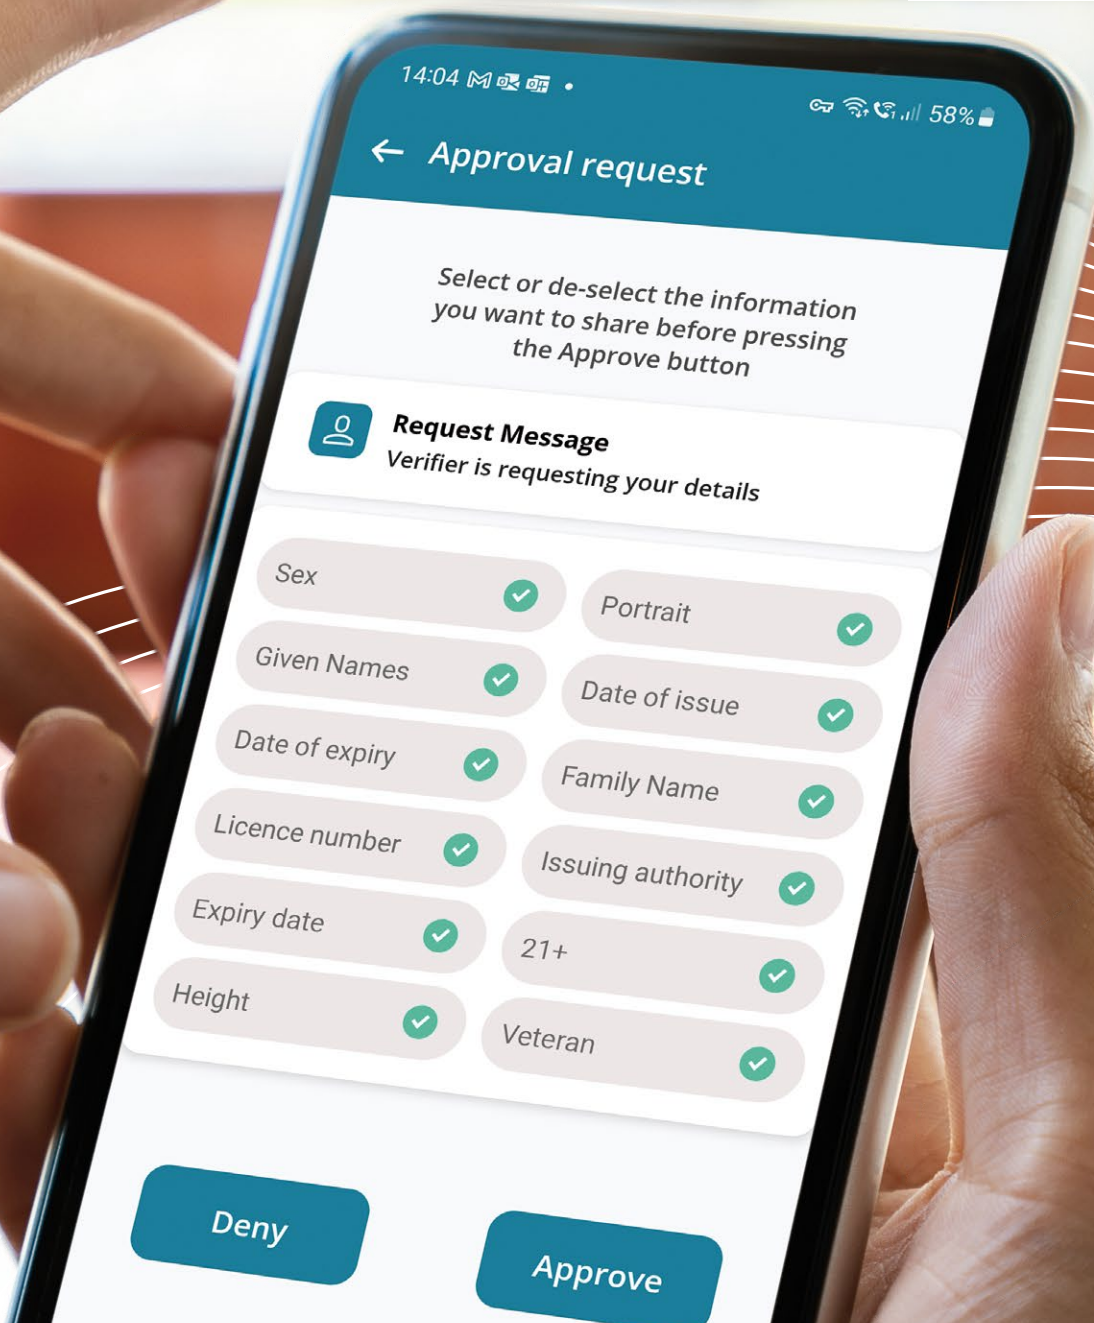

Multi-factor authentication ensures each user is exactly who they say they are, meaning officials can be confident in the integrity of the app.

8

Accessible

The VeriGO MobileID app has been designed and created rigorously inline the Web Content Accessibility Guidelines to support all users and their needs.

Technology accessible to all

4.3 billion people across the globe use a smartphone* and each of those people use important identification documents every day. The VeriGO MobileID app is deliberately designed to be "mobile only".

You will need nothing more than your smartphone or tablet to access the system, and the VeriGO MobileID app. You can leave your travel cards, driving licence, health cards, national ID cards, and any other number of identification documents safely at home and use the app instead.

From a student demonstrating their age on university campus; to a driver confirming their licence in a roadside check; to a patient at a doctor's surgery showing their vaccination status; to a citizen proving their eligibility to vote; the uses and advantages of the VeriGO MobileID app are limitless.

Beyond the individual, businesses and institutions also profit from the use of the app. Streamlined registrations, increased efficiency, enhanced customer and partner experience, and increased agility and responsiveness to change all contribute to improve business outcomes.

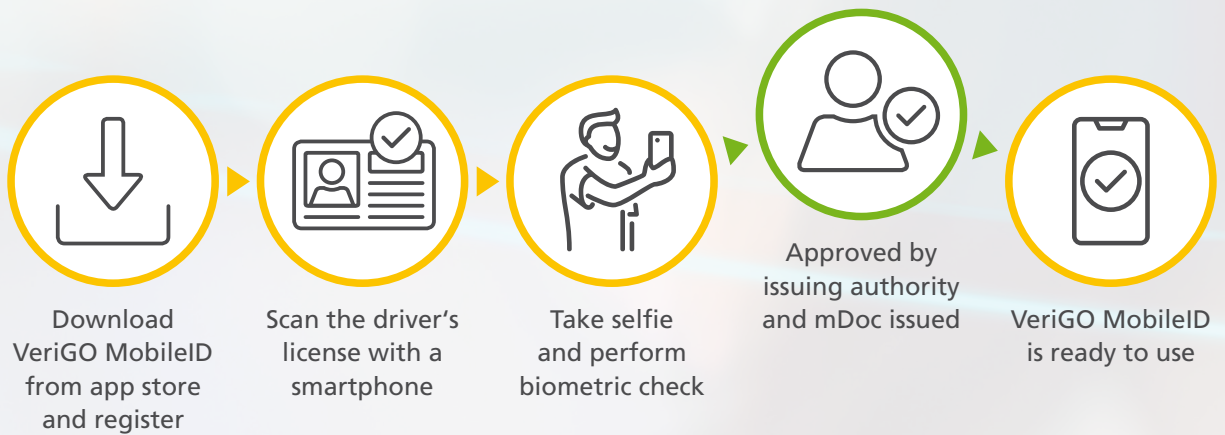

It is as easy to use as it is secure

Simply download the app to your smartphone or tablet and create an account. Once you give your permission, the app can access a copy of your personal data and identification documents. These are then securely saved to the app where you can quickly and easily access them and update them when needed.

VeriGO MobileID app relies on an encrypted system which will hold the data of all users. Using existing technology systems, such as the VeriCORE Enrolment System, users can be assured of extremely well-managed databases, constant support from Veridos engineers, and high-level security which minimizes the risk of document forgery.

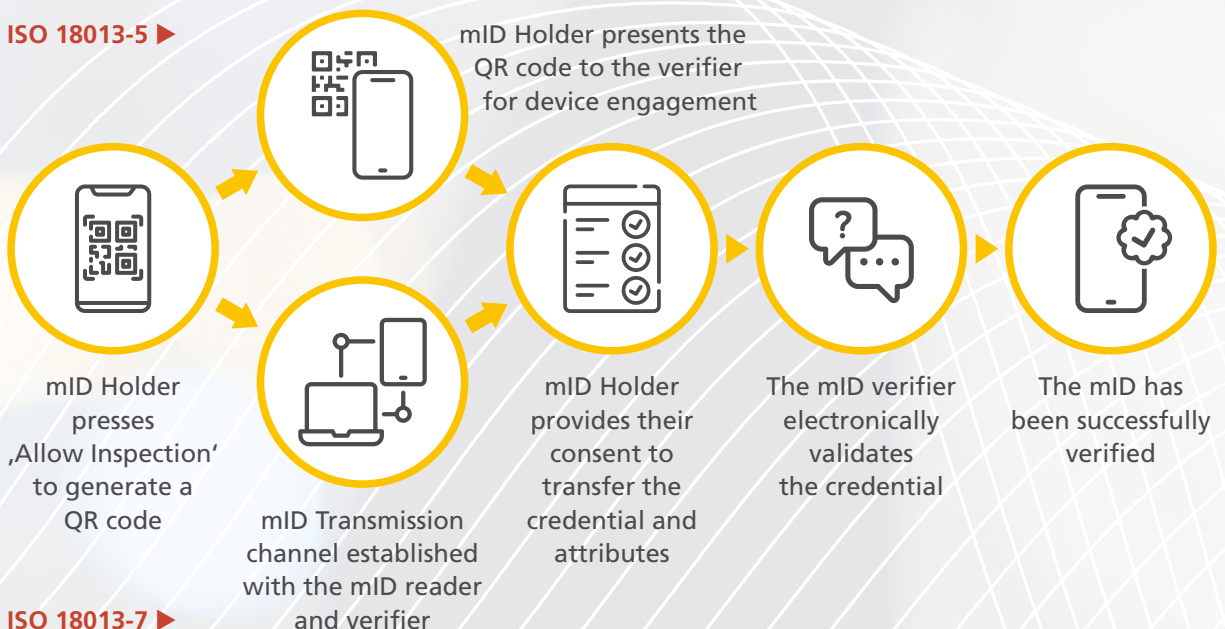

By design the VeriGO Mobile ID app is password-free, PKI, and accessible. Privacy is of the highest priority for Veridos, so we have partnered with privacy-preserving technologies such as Zero-Knowledge Proofs. This ensures that personal user data is only shared on a need-to-know basis and is compliant with ISO-18013-5 Standards.

USE CASE 1: REMOTE ONBOARDING WITH A DL OR AN ID CARD

USE CASE 2: mID VERIFICATION
